

CALF RANCH ASSESSMENT REPORT

Instructions for completing the form

Make sure to list the month and year that you are reporting.

Line 1. Write in the total number of calves purchased for the month. This would include the **total** number of calves purchased from **all** sources.

Line 2. Write in the total number of calves purchased from sale markets, auctions etc. The assessment for these calves was collected at the sale yard and therefore they are exempt from additional fees.

Line 3. Write in the total number of calves purchased out-of-state where the assessment was paid. Usually, all calves coming from brand-inspected states have had the assessment already paid. Documentation of payment is required.

Line 4. Write in the total number of exempt calves. These are calves that were purchased from someone who owned them less than ten days, **and was not the producer**. A Certificate of Non-Producer Status must be filed for these calves with your report.

Line 5. Write in the total number of calves subject to the assessment. Line 1, less lines 2, 3 and 4.

Line 6. Write in the total number of calves from out-of-state for which the assessment was not paid prior to leaving the state of origin. Then, fill in the appropriate column on the reverse side of the reporting form. The total number of head in line 6 are also assessed \$1.00 per head. The Beef Council then sends the entire \$1.00 to the state of origin.

Line 7. Fill in the two boxes and they should be equal.

Sign, date and provide a contact number.
